

Top 7 Reasons to use the new *Silver* solution

- 1. Patented New Technology.** New technology has made Silver Shield extremely more effective than the old colloidal or ionic silvers. The new silver requires very small amounts, it's non-toxic, and is extremely safe.
- 2. Scientifically Supported.** Numerous lab reports and research studies have documented the benefits of using silver. In fact, scientists have found that the new silver solution can destroy 99.9% of all bacteria, viruses, mold, fungus and other pathogens it begins to destroy pathogens within the first 15 seconds.
- 3. Super-Flexible.** Silver Shield can be used inside the body (internal), as well as on the skin and in the orifices (external). Silver Shield can also be used as an effective household disinfectant, much like bleach or other cleaners—only it's much safer!
- 4. Quick Kill Time.** Silver Shield can be effective in just a few minutes. Research shows that exposing silver to most pathogens (including fungus and mold) for only 3-6 minutes will kill them.
- 5. Inexpensive.** When you add up the cost of doctor visits (and the time to see the doctor), prescription medications, and other factors involving "conventional" health care, Silver Shield is a tremendous value.
- 6. Emergency Preparedness.** Because Silver Shield is inorganic with no chemicals or other additives, it can be stored for years at a time. Several agencies and organizations have recommended the use of silver as a potential agent in the fight against bioterrorism.
- 7. Extremely Safe.** Research, testing and long-term use prove that Silver Shield is completely safe for everyone, including children and the elderly.

A History of Silver

2000 BC	Silver mentioned in Egyptian writings
500 BC	Greeks, Romans use silver vessels for water purification
500	Silverware protects the wealthy from the full brunt of the plague
1800	Doctors used silver sutures in surgical wounds
1900	Pioneers and frontier settlers use silver coins in their drinking water and milk to prevent spoilage Silver products are being developed and marketed commercially Silver is used to combat wound infections during WWI Silver is widely used in hospitals
2000	Several commercial airlines use silver water filters NASA selected silver-based system for space shuttle New, superior silver solution technology developed and patented

Silver: A Fighting Chance

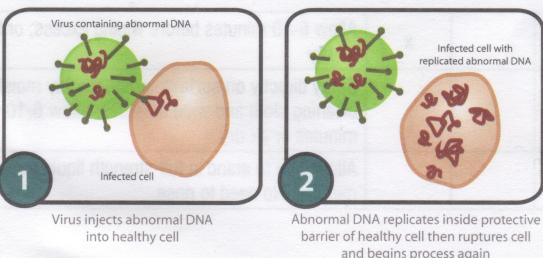

Antibiotics are failing at an ever-increasing rate, healthcare costs are spiraling out of control, and bioterrorism is becoming a greater daily threat. In addition, e-coli outbreaks, bird flu cases and other potential pandemics are poised to create havoc on Americans' health and economy. A new silver solution offers its users a fighting chance.

- Pathogens such as viruses, bacteria and fungi, can inflict terrible damage in the body.
- Antibiotics are not only failing, but also helped create new strains of superbugs.
- Silver, a simple, safe and effective alternative exists.
- Silver products have been safely used as antimicrobial agents.
- A New and vastly improved type of silver solution has been developed.
- A New silver solution is non-toxic, safe and extremely effective against a wide range of pathogens.

How the *Silver* Solution Works

Metallic silver gives off ultra-violet radiation in narrow wavelengths. The narrow wavelength energy radiated from silver destroys the membranes of pathogens and damages their DNA beyond repair. The silver solution also interferes with the energy sources of bacteria, viruses and other microbes. Ultimately, it kills bacteria and reduces viral replication.
